Dear Ms. Dangol,

I am pleased to offer you a position as a **Research Intern** with the **Center for Holistic Integration (CHI)** at the New York City College of Technology, CUNY.

This internship is within the **Quantum Computational Music research initiative**, with an integrated component aligned to the OAA AI Innovation Self-Aware Room system. You will investigate how structured (syntactic) data representations from generative musical systems and related computational processes can be transformed into higher-level semantic interpretations, including comparative work across classical methods, large language models (LLMs), generative AI, and exploratory quantum computational pathways.

The project will also consider division of labor among computational agents and the conditions under which meaningful semantic interpretation can emerge from structured data.

Your work will include:

- Prepare and organize structured datasets from generative/analytical systems
- Study mappings from syntactic representations to semantic interpretations
- Compare frameworks (LLMs, generative AI, and quantum-based approaches; asynchronous)
- Explore coordination and distribution of computational agents within a larger system
- Document findings and identify patterns applicable to broader CHI architectures

The appointment will run from **July through August 2026**, for a total of **160 hours**. Work will be conducted in a **hybrid format**, with significant activity on-site in **Brooklyn, NY**, and additional work completed remotely as appropriate.

This internship is designed as a structured research experience, with milestones and analytical tasks scaffolded throughout the appointment in alignment with academic and programmatic requirements. This offer is contingent upon appropriate authorization under Curricular Practical Training (CPT) and any applicable institutional approvals.

We are pleased to extend this opportunity and believe your background positions you well to contribute meaningfully to this research.

Please indicate your acceptance of this offer by replying to this letter. We are also prepared to submit any additional paperwork your institution requires for this opportunity.

Sincerely,

A handwritten signature in black ink, appearing to read 'David B. Smith'.

Dr. David B. Smith
